

Morris County Soil Conservation District
Notes for Road Work

1. The Contractor shall prepare a plan for the proper dewatering of each stream crossing prior to excavating the stream bed. Plan shall be forwarded to the engineer and Morris County Soil Conservation District for approval. The District shall be notified for inspection prior to each stream crossing construction.
2. Any areas used for the Contractor's staging, including but not limited to, temporary storage of stockpiled materials (e.g. crushed stone, quarry process stone, select fill, excavated materials, etc.), shall be entirely protected by a silt fence along the low elevation side to control sediment runoff.
3. Prior to construction, the contractor shall be responsible for notifying the Morris County Soil Conservation District of any staging and/or stockpile location areas and for obtaining a Soil Erosion and Sediment Control Certification for these areas.
4. A crushed stone, vehicle wheel-cleaning blanket shall be installed at the Contractor's staging yard and/or stockpile areas to prevent off-site tracing of sediment by construction vehicles onto public roads. Blanket shall be 15 ft. x 50 ft. x 6 in. (minimum), crushed stone 2-1/2 inches in diameter. Said blanket shall be underlain with a suitable synthetic sediment filter fabric and maintained in good order.
